

CEDRAT NEWS

Flux Solutions & Mechatronic Products

Key words: Actuator 08, CETIM, CIVA^{nde} 9.0, CEDRAT Group, InCa3D, Multiphysics, Piezo, Training,...

Editorial

Bruno RIBARD - CEDRAT Group's CEO.

It is always true that building for the future depends on our understanding of the past. Looking briefly at what 2007 held for CEDRAT Group, we can report a good increase in turnover, major new releases (Flux V10 and CIVA^{nde} 9), the ADAPTED SOLUTIONS (Portunus software) partnership, over 1,000 built (60% additional turnover), products delivered to NASA and many R&D and industrial contracts signed. 2007 is behind us. We can now look forward to 2008 and a year of change.

We have decided to capitalise on the synergies between our 3 entities, CEDRAT, CEDRAT TECHNOLOGIES, MAGSOFT and ADAPTED SOLUTIONS. This means setting up a new organisation around a single brand, "Groupe CEDRAT". The goal of this merger is to provide you better services in our 5 key fields:

Software: Flux, Portunus, InCa3D, CIVA^{nde}, SPEED, Motor-CAD, PSCAD, ...

Mechatronics: Piezo products and systems,

Consulting: Studies and projects management,

Training: Mechatronics, magnetism, software & technical trainings, ...

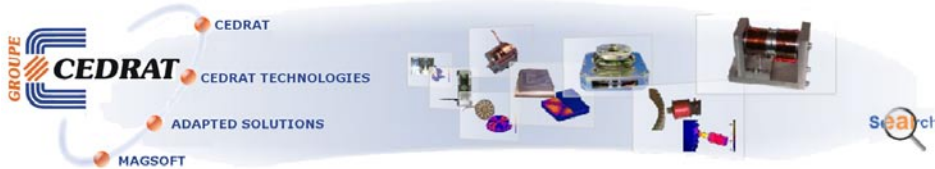

Helpdesk: Support, documentation.

Part of this change is to change the name of your magazine from "Flux Magazine" (~~FLUX~~) to "CEDRAT News". We hope it meets with your approval !

Enjoy the read and best wishes for 2008.

A new web site !

We invite you to visit www.cedrat.com. It contains many other innovative mechatronic technologies, services and CAD software for their design.

Partnership with Cetim !

Frank CLAEYSSEN - CEDRAT TECHNOLOGIES.

CETIM selects CEDRAT to complete its offering in Mechatronics !

CETIM is the French Technical Centre for mechanical engineers. Created in 1965, this prestigious organization (700 employees, including 400 engineers and technicians) is placed under the official guardianship of the State. CETIM offers mechanical R&D services: design, development and testing. Technical and scientific training courses are proposed in all mechanical fields: component fatigue, control, metrology, noise and vibration, mechanical production...
